The models and equipment versions illustrated and described in this brochure and some of the services listed are not available in all countries. Some of the cars illustrated are equipped with optional features for which an extra charge is made. Details concerning the delivery specifications, appearance, performance, dimensions and weights, fuel consumption and running costs of the vehicle were correct to the best of our knowledge at the time of going to press. Deviations from the colours and shapes shown in the illustrations may occur. No liability is accepted for errors and printing errors. The right to introduce modifications is reserved. Not to be reproduced, including in part, without the written approval of AUDI AG.

Here today, there tomorrow. You live on the move, you live in the now. After all, age is irreversible. That’s why you want a car that can keep up with the frenetic pace of your lifestyle. Or shall we say: one that is so well prepared for you that all you have to do is get in. The Audi Q3 is this car.

Start young. Live Big. The new Audi Q3.
With the same recognisable silhouette, the new Audi Q3 maintains its coupè-like appearance. With the addition of subtle design features like the 3D grille, chrome-plated tailpipe, LED headlights and panoramic sunroof, it’s a car that’s now even more eye-catching.

Inside, innovations like Audi drive select and electric lumbar support mean that the new Audi Q3 is not only beautiful to look at, it’s also comfortable to drive.
Living dynamics. The athletic silhouette with the dynamic flat rear window signalizes urban sportiness. The exciting interplay of light and shade modulates its sides.

And the panoramic glass roof opens up the generous interior to the sky.

Enjoy the view.

The Audi Q3 Experience
En route to driving enjoyment.

Get in, drive away, put new plans into practice. Always on the move.

In the Audi Q3, TDI engines will be driving you forward. All of them efficient and dynamic. From 110 kW to 135 kW and at a top speed of up to 219 km/h. The energy recuperation will actively save you fuel and reduce CO₂ emissions. During every trip. Every day.

The Audi Q3 Experience
Space for you. Space to develop. Expressive and individual: the interior of the Audi Q3.

The characteristic leather-covered steering wheel in the 4-spoke design is pleasant to grip, as is the leather gear lever knob.

En route to feeling comfortable.

The Audi Q3 Experience
The high-resolution colour MMI display is fitted in the centre of the dashboard where it is visible. You also have a Bluetooth interface and an Audi music interface to connect your iPod or MP3 player.
The seat upholstery underlines the high quality of the interior. Feel at home – there is plenty of legroom for the driver and the front passenger as well as in the back. And your luggage travels comfortably too: the generous loading space can be enlarged even further by folding the rear seat or the front-passenger seat down.
The ride is over. Or is it? Even when you have already reached your destination in the Audi Q3, you will want to choose a new one within minutes. Remain demanding. Remain en route. In the Audi Q3.
LED lights

Look good. See better.

The Audi Q3 is available with standard LED headlights. This innovative technology means that a continuous beam of bright light is emitted, lighting the road ahead with a colour close to daylight and providing an unprecedented clarity of vision.

What’s more, the sleek and subtle design of Audi LED headlights make them the perfect addition to the new Audi Q3. And with dynamic LED indicators at the rear, the striking look is complete.
TDI: Start an evolution. And keep repeating it.

One in every two Audi cars sold today is a diesel. What would perfectly normal have looked like 20 years ago, when Audi revolutionised the market with the first 2.5 TDI engine. Since then, developments such as common-rail technology have made TDI even more efficient. Injectors ensure the fuel is finely and precisely distributed. Consequently, since the first TDI, the engines have become more economical, whilst specific output has increased. It’s only logical that a diesel car should then enter the world of motorsport. And successfully too: in 2006, Audi was the first carmaker to win the Le Mans 24 Hours with a diesel-powered racecar, the Audi R10 TDI – and then went on to repeat this victory several times over, most recently in 2011.

The combination of turbocharging and direct injection also ensures superior driving dynamics and efficiency for the 2.0 litre diesel unit. In the Audi Q3, a new generation of the four-cylinder engine is used, based on the most produced diesel engine in the world. It offers further optimised acoustics, greater refinement and more spontaneous power delivery. The engine is available with two output ratings: 110 kW and 135 kW.

- High torque of 340 Nm (for 110 kW) and 380 Nm (for 135 kW) over a wide speed range
- Majestic, effortless pulling power even from standstill
- High output of 135 kW
- Modern common rail technology and injection pressure of up to 2,000 bar provide for a high level of refinement and precise fuel metering
- 135 kW unit combined with precision 7-speed S tronic dual clutch transmission and front-wheel drive
- New in the Audi Q3: Highly efficient 4-cylinder inline petrol engine combining turbocharging with direct petrol injection - TFSI
- 110kW unit combined with precision 6-speed S tronic dual clutch transmission and front wheel drive.

A diesel on the podium: the Audi R18 TDI

Schweitzer turbocharger with optimised adjustable turbine geometry

1,800 bar high pressure injection system

Engine with reduced friction

Compensating shaft module

Pressure regulated oil pump

2.0L TDI engine

1.4L TFSI engine
What is the benefit of two clutches?

A double saving: time and energy.

The 7-speed dual-clutch transmission S tronic enables rapid gear shifting with hardly any perceptible break in propulsive power and is efficient at the same time.

Long ago, in 1985, Walter Röhrl tested this technology in the Sport quattro S1 — and was suitably impressed. Audi drivers share their enthusiasm to this day, because the modern S tronic changes gear in a flash. To do this, two multi-plate clutches serve the different gears. One clutch transfers the torque via a drive shaft to the gearwheels of the odd-numbered gears. The second clutch serves the even-numbered gears via a hollow shaft. Both parts of the transmission are permanently active, but only one of them is actually connected to the engine via a closed clutch. For example, when the driver accelerates in third gear, the second part of the transmission is already engaged in fourth gear. The gear change happens very quickly through the change of clutches — the first clutch opens while the second one closes. The gear change only lasts a few hundredths of a second and is completed with virtually no interruption in the power flow. It runs so smoothly and comfortably that the driver barely notices it. It doesn’t matter whether the driver chooses the fully automatic modes with the program D (Drive) or S (Sport) or changes gear manually with the selector lever or the optional shift paddles on the steering wheel — the gear change feels precise and extremely sporty. Even with all of this speed and technology, the S tronic still remains efficient. Due to its high level of efficiency, both fuel consumption and emissions can be reduced. While the TDI engine comes with 7-speed S tronic transmission, the TFSI comes with 6-speed S tronic transmission.
With quattro, we have created one of the best all-wheel drive systems in the world.

Of course, that was not good enough for us.

quattro is a permanent all-wheel drive system. If the wheels on one side of the vehicle lose grip on the road and threaten to spin, the wheel-selective torque distribution transfers the power through the transfer gear box and the Haldex clutch to the side or individual wheel with a better grip. The benefit is better traction and thus improved acceleration as well as more safety, thanks to more balanced lateral guide forces.
Technology is advancing at an ever faster pace and choosing the right technology for your car is an important decision.

MMI Navigation Plus*
With HDD-based MMI Navigation, you’ll have access to 3D map view and 3D point-of-interest display. It means you’ll be guided to your destination with greater ease. And, because destinations can be entered with speech recognition, your attention remains firmly on the road.

Colour Driver’s Information System (DIS)*
A high-resolution 7-inch colour display, located in the instrument cluster, provides key information from the driver assistance systems.

Audi parking system advanced with rear reversing camera*
Aids parking by acoustically and visually indicating distances to obstacles with guiding lines. Measured by sensors and a rear reversing camera.

*Optional
Seeing and being seen is a safety issue.

The standard LED headlights emit beams of bright light with a color close to daylight and an unprecedented clarity of vision. The LED headlights also come with LED dynamic indicators in the rear. These indicators have LEDs which light up at intervals of one-tenth of a second. This enables other drivers to exactly determine which direction the car is turning, even from far away. Talk about safety.
It is the equipment that turns an Audi into your Audi.
Upholstery
Leather/Leatherette, black
Leather/Leatherette, Pistachio beige

Seats/seating comfort
- Front seats, electrically adjustable
- centre armrest, fold can be adjusted lengthways, adjustable angle, with fold-open storage compartment and one 12 V socket in the rear centre console
- 4-way lumbar support, electric, for driver and front passenger seats, with horizontal and vertical adjustment
- Head restraints: for all 5 seats, height manually adjustable
- Folding rear seat backrest: can be split and folded 40:60 or fully

Seats/seat covers
- Seating comfort
- Inlays
- Infotainment
- Interior equipment
- Rear centre armrest with cup holders

Rear centre armrest with cup holders.
**Materials**: Walnut balsamic, brown

**Aluminium**: Tangent Bronze/Silver

*Optional

1. Available on 2.0 TDI (110kW) and 1.4 TDI (110kW).
2. Available on 2.0 TDIq (135kW).

---

**Interior**

- **Seats/seat covers**: Seating comfort
- **Inlays**: In Aluminium
- **Infotainment**: Deluxe automatic air conditioning
- **Interior equipment**: MMI radio

---

**Driver information system**

- with a white 5-inch TFT display (located directly in the driver’s field of view), displays the following: outdoor temperature, fuel consumption data overview, display of additional loads, gearshift display and fuel-saving tips for adopting a more economical driving style

---

**Audio and TV systems**

- **360W sound system**: headlining loudspeaker located centrally in the dashboard, total output 180 watts, 6-channel amplifier

---

**MMI radio**

- with single CD player and SDHC memory card reader (USB MP3, WMA and AAC compatible to 2GB) + external connection + Bluetooth 4.0 & 5-inch TFT display, WMA, AAC and MP3 audio files + included: 5 GB station memory, 6 stations and 16 station memories + multi-country own language adjustment + MMI on 6.5-inch TFT colour display, MMI operating concept with 6.5-inch TFT display, MMI operating concept, dynamic station list (for VHF), 50-station memory, VHF, MW and LW reception + speed-sensitive volume adjustment (GALA) + phase diversity, TP memo function whilst driving + car menu + 8 passive loudspeakers in the front and rear, total output 80 watts

---

**MMI Navigation Plus**

Steering wheels/gear levers/controls
leather-covered multifunction steering wheel in 4-spoke design; with multifunction buttons for operating the Audi radio, voice control system and fitting for mobile phone
Leather-covered multifunction steering wheel in 4-spoke design; with paddle shifters*

Parking aid plus with rear view camera* rearward-pointing visual parking system for the front and rear with display of symbols on the screen to indicate distance from an obstacle; measurement is by ultrasonic sensors contained in the bumpers
Parking aid, rear

Cruise control
at speeds of 30 km/h and above, the system keeps the vehicle at a fixed distance from the vehicle in front; measurement is by ultrasonic sensors concealed in the bumpers

Hill-descent control
speed control by means of brake intervention and engine drag torque, whilst constantly maintaining the speed depending on the surface. The driver just has to steer, but does not have to accelerate or brake

Audi drive select
changes vehicle characteristics by, e.g. adapting power steering assistance, accelerator and gearshift characteristics. Available modes: comfort, auto and dynamic

Lights
LED rear lights with dynamic turn indicators: in an innovative lighting design, in the rear lights, LED lights and indicator in energizing and long lasting LED technology for Foster activation and good recognition. Includes all weather light function to reduce the risk of drivers being dazzled when visibility is poor

LED headlights provide lower energy consumption and enhanced contrast with colour similar to daylight for increased safety and good recognition. Includes all weather light function to reduce the risk of drivers being dazzled when visibility is poor
LED interior lighting package and glare-free lighting for the passenger compartment in energy-saving and long-lasting LED technology. Comprising of an ambient reflected light in the rear and a direct beam of light from a LED module at the back, the panoramic roof in LED technology is the centre component. The light engine is located in the centre of the openable roof section, light pipes lead the light towards the lights at the periphery. The integrated light modules in the roof are fitted with a relax light function and mood lighting for the front passenger seat and door armrests to help occupants find their way around, in line with after-dark lighting. Externally variable, automatically tilting, manually stowable folding and easy release on driver’s side with wing mirror tilt indication.

Interior mirror electronically adjustable, vanity, anti-glare lighting for the passenger compartment in energy-saving and long-lasting LED technology. Comprising of an ambient reflected light in the roof module and entrance lighting as well as illuminated make-up mirror, storage compartment in the centre console and drinks holders. Lighting for door pockets, footwells and inside door handles, reflex lighting for centre console and door inner panels to help occupants find their way around, in line with after-dark lighting. Exterior mirrors electrically adjustable, heated, electrically folding and auto dimming on driver’s side with integrated LED indicators in 2 sections, electrical activation to raise and open the front glass section, tinted glass insert; including an electrically operated sun blind for the front and rear passengers, convenient closing from the outside via the central locking system or radio-operated remote control; ensures a comfortable interior that is flooded with light, improved interior climate by means of efficient ventilation for controlling the automatic driving light, the coming home/leaving home function and the automatic windscreen wiper function, includes windscreen with grey coloured strip (along the top edge), includes windscreen with acoustic glazing (for improved windscreen insulation and a reduction of outside noise).

Audi Top Assist
By your side, no matter where you are across India.

Our philosophy of Vorsprung durch Technik goes beyond advancement through technology. It is the pursuit of perfection. It is a philosophy where luxury transcends cars. That’s why at Audi we have introduced the Audi Top Assist program where you can enjoy uninterupted driving pleasure. With the Emergency Road Side Assistance services across the country, our team of experts are at your service, 24 hours a day, 7 days a week.

**THE AUDI ADVANTAGE**
- Two dedicated toll-free numbers
- 24 hours, 7 days a week, 365 days a year service
- 95% coverage of India with over 600 service providers
- Dispatch of a motorcycle rider, a taxi and a towing truck at site
- Taxi of upper-class standards free of cost for up to 48 hours
- Travel & accommodation facilities in case of immobilisation for more than 24 hours
- On-site repairs, delivery of fuel and spare keys
- Assistance available during standard warranty period of the car

To avail of the Emergency Road Side Assistance all you have to do is dial one of our dedicated toll-free numbers and we will immediately dispatch a motorcycle rider wherever you are. In case your Audi needs further attention, we will dispatch a specially designed towing vehicle to shift it to the nearest service centre. In fact, in special cases, we may also arrange for alternate travel and accommodation facilities.

Speak to an Audi Dealer for more information.

---

**Efficiency: standard in every Audi.**

Vorsprung durch Technik is the claim to which the Audi brand is committed. It includes giving careful consideration time and again to each droplet of fuel. For many years, Audi has been translating this claim into tangible reality on all its models – and as a developer of numerous innovations, it is having a lasting influence on efficiency standards. Whether with the TDI, FSI, and TFSI engine concepts, with transmission technologies or with the Audi Space Frame (ASF). To achieve on-going improvements in energy consumption, a number of intelligent efficiency measures – specially tailored to each vehicle – are combined.

Efficiency with a methodical approach – individual and standard. A commitment which is already leading to convincing results. Audi already has many models in its current range that emit less than 140 g CO₂/km. An effective way of reducing emissions. And just as impressive as the fact that a large proportion of Audi vehicles already meet the strict EU 5 emissions standard. All this demonstrates the know-how of Audi – what drives us every day to further enhance sustainability and efficiency in the future.
**Audi Q3 35 TDI quattro**

- **Engine type:** 4-cylinder in-line diesel engine with common rail injection system and exhaust-gas turbocharging
- **Displacement:** 1968 (4) cc
- **Max. output¹:** 110 kW at 5000-6000 rpm
- **Max. torque:** 340 Nm at 1750-2750 rpm
- **Fuel grade:** Diesel
- **Fuel consumption²:** 6.9 l/100 km
- **CO₂ emissions:** 171 g/km
- **Power transmission/wheels:** Front-wheel drive
- **Tyres:** 235/55 R17
- **Wheels:** 7J x 17 Cast aluminium wheels
- **Transmission:** 6-speed S tronic
- **Top speed:** 200 km/h

---

**Explanatory notes**

1. The figures given were calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).
2. A vehicle’s fuel consumption and CO₂ emissions do not just depend on how fuel efficient the vehicle uses the fuel, but also influenced by driving behaviour and other non-technical factors. CO₂ is the greenhouse gas primarily responsible for global warming.
3. The values stated were calculated using specified measuring procedures as per Bharat Stage IV by ARAI.

**Important note**

Inspections are due as shown by the service display.
Mobility is a way of life – one that you can individually design with your Audi Q3. Whatever the destination, the products from Audi Genuine Accessories offer countless possibilities for reaching your goal. You benefit from made-to-measure solutions that impress on account of their design and functionality. After all, creativity during the development phase and high production standards alongside the large number of testing procedures are just as important to Audi Genuine Accessories as they are for each and every Audi vehicle. Discover what tailor-made solutions Audi Genuine Accessories has in store for you.
Audi design is unique. Alongside an impressive appearance, products from Audi Genuine Accessories must also meet our rigorous standards when it comes to functionality and achieving a high level of quality. This is why our roof boxes go through extensive crash testing at the development stage, ensuring that they are ready to face numerous demanding situations.

The result is clear to see and is best reflected by the practicality of the product – not least because the roof boxes must demonstrate their characteristics in several different testing procedures, such as weather tests in extreme climate zones, whether it is rainy and stormy, the sun is beating down, or the temperature has plunged. The roof boxes must prove that they can withstand the many influences of the climate and that they can endure this durability test over a long period of time. Whatever you are planning, the new luggage boxes from Audi Genuine Accessories ensure that you can always transport your luggage reliably and conveniently.
Here today, somewhere else tomorrow. You live mobile and you think mobile – that is why you want a car that can keep up with you and your needs. Or even better: a car that is so well adapted to you that all you have to do is climb in. The Audi Q3 is that car. Powerful and multifaceted. Compact yet full of hidden space. Efficient and expressive.

As you would expect, you can make your Audi Q3 even more versatile using the many options on offer from Audi Genuine Accessories to lend your mobility a greater sense of individuality. Discover these options on the following pages and emphasise the universal character of your Audi Q3.
Sophisticated design, revealed from all angles.

Amplify the automotive sportiness of your Audi Q3 with the exterior product ranges from Audi Genuine Accessories. Stand out on the dynamic body line of your vehicle by equipping accessories such as the cast aluminium wheels in 5-arm pila design and high-quality valve caps, both of which are specifically available for the Audi Q3. You can even create a sporty ambience in the vehicle interior with the pedal caps in stainless steel. Whatever range of equipment you choose, you will invariably enhance the athletic appearance of your Audi Q3 with the exterior product ranges from Audi.

01 Cast aluminium wheels in 5-arm pila design, Anthracite.

The cast aluminium wheel in size 8.5 J x 19 for 255/40 R 19 tyres impresses with its distinctive design.*

* Please note the information on relating to wheels on page 82.
01 Cast aluminium wheels in 5-arm pilo design, Black
The cast aluminium wheel in size 8.5 J x 19 for 255/40 R 19 tyres appeals with an impressive look.*

02 Valve caps
The four metal valve caps with embossed Audi logo provide enhanced protection for the valve against dust, dirt and moisture. Available for rubber, metal and aluminium valves.

03 Anti-theft wheel bolts
Can only be loosened with the special adapter provided, making it difficult to steal the wheels.

*Please note the information relating to wheels on page 44.
Offroad style package

Enhance the appearance of the Audi Q3. Fascinating accents lend your vehicle a more sporty and agile appearance. The complete package includes front and rear bumpers, door cover strips, wheel arch extensions and running boards.

01 Front bumper

Painted in Stone Grey, metallic. Used in combination with the stainless-steel underbody protection and the radiator grille with vertical chrome struts, the front bumper protects the front and the front underside of the vehicle.

02 Rear bumper

Painted in Stone Grey, metallic. Alongside the stainless-steel underbody protection, the rear bumper protects the underside at the rear of the vehicle.

03 Door cover strips

Painted in Stone Grey, metallic. Reduce damage, for example from stone chipping.

04 Wheel arch extensions

Painted in Stone Grey, metallic. Emphasise the striking design of the vehicle and protect the body contour.

05 Running boards

Made from stainless steel. The running boards make it easier to load equipment in the roof and luggage box on the roof. Rubber pads protect against the risk of slipping. Load capacity of 200 kg each.

06 quattro film set

The ‘quattro’ logo as a film set for the rear section of the vehicle on both sides. Available in either Brilliant Black or Ice Silver, metallic depending on the exterior vehicle colour.

07 Pedal caps in stainless steel

Dazzling and practical at the same time. The pedal caps are made from brushed stainless steel. The rubber coating on the surfaces ensures enhanced grip. Available for automatic and manual gearboxes.
Free space and storage space.

Stay spontaneous and flexible with the transport solutions from Audi Genuine Accessories. Whether you have extra luggage in sports equipment, you need not worry about your storage space. The wide selection of products from Audi Genuine Accessories range from luggage boxes to a camping tent developed to be the ideal fit for your Audi Q3. These options give you plenty of room for your plans and provide you with the freedom to take advantage of every opportunity.

Luggage boxes

Audi genuine accessories featuring ruggedly painted shells in aAINER, sportier visual concept. Platinum Grey roof box with Brilliant Black side blades and chrome Audi rings for a high-end by near-free look. Boxes are lockable and can be opened from both sides for comfortable loading and unloading. With external handle for closing the box. Simple quick-action securing system including torque limitation. Positioned towards the front of the vehicle, making it easy to access the luggage compartment. Available in three sizes: 300 l (page 63), 360 l (page 62) and 405 l (page 63). Can only be used in conjunction with the carrier unit. Further important information can be found on page 82.
01 Luggage box (405 l)*

02 Bags for roof boxes

Excellent protection: These bags are easy to open with a waterproof flap featuring water-tight side pockets. Ideal for making full use of the lockable roof boxes. As it is possible to pair the individual bags in various combinations. Available in three sizes: S (80 l), M (200 l) and L (300 l).

03 Luggage box (300 l)*

04 Carrier unit for roof rail

Perfectly designed for use with the bicycle rack, kayak rack or the ski and luggage box. The profile is made from anodised aluminium tubing. The carrier unit is easy to fit and is lockable. Maximum permissible gross weight of the carrier unit, roof rack modules and load: 75 kg. A practical storage bag is available separately.

05 Roof carrier bag

For storage or transport of carrier units and smaller roof rack modules. Made from durable material, with multiple loops and a side pocket for suitable tools or small parts. Available in two sizes.
Camping tent

Inflatable tent featuring an innovative and high-quality design with double-walled air struts. Includes bag, pump, tent pegs, repair kit and two separate awnings. Sleeps up to three people. Quick and intuitive to pitch. Simply roll out the tent and inflate. Extremely stable, even when faced with wind and different weather conditions. A weatherproof connection between the vehicle and tent is established through a tailor-made vehicle attachment. Can also be used without a vehicle. More information can be found on page 82.

*Please note the information regarding the maximum permissible trailer load and the gross vehicle weight rating of your vehicle in the vehicle wallet.
01 Adapter cables for the Audi music interface

Enable various Apple iPod and iPhone models as well as other media players to be connected. Operated via the MMI system if this function is supported by the media player.

02 Audi SD card

For storing your music: ultra-compact and universal SDHC memory card (8 GB), class 6. Comes with a protective case.

03 Audi USB memory key

The exclusive storage device that emulates the look of an authentic Audi vehicle key. Memory capacity: 8 GB. The special 90° position for laptops makes the device particularly convenient to use. Suitable for all vehicles equipped with a USB connection or the Audi music interface. Can also be used as a USB stick outside the vehicle.
No one is too small for an Audi.

Whether big or little – delight for Audi grows constantly. To ensure the safety and driving comfort of even the smallest Audi passengers, Audi Genuine Accessories offers practical, high-quality products, guaranteeing you and your smallest family members a safe and relaxed journey in your Audi Q3.

Q1 Audi child seat

Can be used in the forward or rear-facing position. With adjustable seat shell, integrated seat belt and adjustable head rest. Can only be used in conjunction with the ISOFIX base. Suitable for children weighing between 9 and 18 kg (approx. 3 to 6 years of age).
01 Audi baby mirror
Easy-to-read display of the rear seat thanks to the black fascia; keeping the baby in the rear-facing baby seat in view. Tilt angle can be adjusted as required. Not suitable for integrated head rests.

02 Audi backrest protector (not pictured)
A practical and practical product recommended for motorists running baby boy chairs. Also prevents soiling of the seat (child seat) while travelling in the baby seat, also when additional storage space is in the line of fire (small objects). Tailored to match the design of the child seat; the child seat underlay and the interior of the vehicle. Not suitable for integrated head rests.

03 Audi baby seat
The integrated seat belt can be adapted to suit the head rest of the rear seat thanks to the Velcro fastener, keeping the baby in the rear-facing baby seat in view. Viewing angle can be adjusted as required. Not suitable for integrated head rests.

04 ISOFIX base for the Audi baby seat and Audi child seat
An extra secure fit for the Audi baby seat and the Audi child seat can be installed and removed quickly. The adjustable support stand provides enhanced stability. Provides an optimum level of protection for the child. The ISOFIX base is optional for the baby seat, but is mandatory for the child seat.

05 Child seat colour variants
All child seats are available in the colour combinations of Misano Red/Black and Titanium Grey/Black. The materials used are kind to the skin, breathable, light-resistant, removable and washable and are certified in accordance with the Oeko-Tex Standard 100. Replacement covers are available from your Audi partner.

06 Audi child seat youngster plus
Offers a high level of comfort thanks to the intelligent seat belt guide. The height and width of the footrests are adjustable. Adjustments to the seat can be made with ease using a viewing panel. Suitable for children weighing between 15 and 36 kg (approx. 4 to 12 years of age).

07 Child seat underlay (not pictured)
Tailored to the design of the individual child seats of the seat box, rear seats are protected against dirt and potential imprints made by the child seat. Includes two practical storage pockets. Fully compatible with all Audi child seats, even where the ISOFIX base is used.

Note:
The ISOFIX base is optional for the baby seat, but is mandatory for the child seat.
Every impression counts.

Maintain the dazzling appearance of your Audi Q3 – inside and out. Using the products from Audi Genuine Accessories, you can keep everything in its place at all times and enhance the comfort of your Audi Q3. This range includes products such as the coat hanger, luggage compartment net and storage bags. A whole series of care products is available from Audi Genuine Accessories, both for the interior as well as the exterior, allowing you to shine effortlessly in any situation with your Audi Q3.

Comfort and protection.
02 Care products

Protects luggage against slipping. For fixing luggage into position via the lashing points on the luggage compartment floor.

05 Luggage compartment shell
Made in measures luggage compartment protection. Reduces and prevents the air inside the luggage compartment from leaving the luggage compartment floor.

06 Luggage compartment tray
For a secure area of luggage that can be fixed where it is transported. The plastic tray features high edges as well as a lip on the outside and pocket to close. The tray prevents items from sagging.

07 Rubber floor mats
Made of rubber. Reduced protection against heavy soiling. Secured to the vehicle using the fixing points on the floor. With ‘Q3’ logo.

08 Premium textile floor mats
Made to measure. Luggage compartment protection. Balanced performance. The all-round edge prevents liquids from leaking onto the luggage compartment floor.

Mud flaps
Made from high-quality plastic. Prevents damage to paintwork and dirt from being washed off or built up on the areas around the sill and rear corners of the vehicle. Available as a set of two for the front and rear of the vehicle.

Mud flaps (not pictured)
Made from high-quality plastic. Prevents damage to paintwork and stops dirt building up on the areas around the sill and rear corners of the vehicle. Available as a two-part set for the front and rear of the vehicle.

Tailored to the high-quality materials used to construct your Audi. Suitable for numerous applications, either in the vehicle interior or for outer care, depending on the product.

Made-to-measure luggage compartment protection. Reduces and prevents the air inside the luggage compartment from leaving the luggage compartment floor.

Made-to-measure luggage compartment protection. Reduces and prevents the air inside the luggage compartment from leaving the luggage compartment floor.

Made of rubber. Reduced protection against heavy soiling. Secured to the vehicle using the fixing points on the floor. With ‘Q3’ logo.

Made of rubber. Reduced protection against heavy soiling. Secured to the vehicle using the fixing points on the floor. With ‘Q3’ logo.
01 Rear protective cover
Protects large surfaces against dirt at the rear. The versatile zip fastening system allows a dog to enter and exit the vehicle for the rear doors. Simple and fast to attach. Durable surfaces, water-tight and washable.

02 Safety harness for dogs
Meets statutory regulations. Made from highly resistant materials including tear-resistant nylon and stainless steel. Can be quickly latched to avoid pressure marks. With reflective strips in the chest area. Can also be used as a harness for any vehicle the dog is in.

03 Protective film for paintwork (not pictured)
Transparent, heavy-duty high-performance protective film with an extra clear coat of paint. Reduces the effects of stone chipping, scratches and scrapes. Applied to the front of all Audi vehicles.

04 Loading sill protective sheet (not pictured)
The made-to-measure protective sheet for the loading sill, made from transparent film, enhances the level of protection for the bumper against damage when loading and unloading the luggage compartment.

05 Protective film for the rear sill panel (not pictured)
Transparent and effective solution for protecting the very area of the rear doors at the wheel housing arch. Transparent film made from scratch-resistant, robust plastic.

06 Luggage compartment box (foldable)
Made from tear-resistant polyethylene offering a storage capacity of up to 32 litres. Easily assembled using Velcro tabs, providing the ideal and practical solution. When closed flat, the box also acts as an additional protective underlay for the luggage compartment. Washable and easy to clean.

07 Business bag
More space for your business tools. The high-quality business bag offers you a storage volume of approx. 14 litres - enough space for a laptop of up to 15 inches as well as all the other things you need in the office. Can be securely fastened to the rear seat bench or the front passenger seat using the three-point seat belt. Can also be used outside the vehicle as a practical business bag.

08 Rubbish bin
A practical product for disposing of rubbish accumulated when travelling, with a waterproof interior compartment and a capacity of approx. 5 litres. Can be fitted to the backrests of the front seats. Easy to clean. Standard refuse bags can also be used and secured easily inside the rubbish bin.

09 Storage bag (not pictured)
A handy, multi-purpose bag offering a useful storage space and organisation system for the vehicle. Secured to the backrest. Can be folded away in just a few steps and used outside the vehicle.
**Comfort and protection**

**01 Sun protection system**

Offers virtually full sun protection. Made to measure, and easy to fit and store away. Available as a two or three-part set. Sets can be combined.

**02 Espresso mobile**

With a pressure of 16 bar, the espresso mobile delivers true espresso enjoyment, complete with authentic crema. The set includes 18 ESE pods, two break-proof espresso cups, a micro-fibre napkin and an elegant case. Connection via the cigarette lighter in the vehicle interior.

**03 Rear seat box**

A sturdy storage solution for various small items. The high-quality rear seat box with a volume of approx. 12 litres makes journeys even more comfortable. It can be secured to the rear seat bench in just a few steps using the standard three-point belt. Includes a mesh pocket with internal drawstrings to secure the contents.

**04 Rear seat bag (not pictured)**

An organised storage space for the rear seat bench. With its various interior pockets, practical mesh pockets, and total volume of approx. 27 litres, the rear seat bag in high-quality Audi design provides plenty of space for the various items required on a long journey. It can be secured using the three-point belt. Includes a non-slip surface on the underside of the bag.

**05 Wind deflectors**

Reduces interior climate and prevents condensation from forming. The door wind deflectors for your Audi allow the vehicle interior to be ventilated, thereby contributing to increased driving comfort – even in snow or rain. By opening the window to just above the bottom edge of the deflector, uncomfortable heat build-up from direct sunlight becomes a thing of the past. Made from high-quality cast acrylic glass. Available as a two-part set for the front or rear of the vehicle.

**06 LED gooseneck reading lamp**

An extremely bright light where you need it, thanks to the flexible silicone rubber neck. High level of stability in any position. Connection via the cigarette lighter.

**07 Seat back pocket**

An additional storage space is provided by a high-quality, fold-down bag with practical mesh pockets. The gooseneck lamp can be folded down to form an extension. The pocket has a volume of approx. 1.5 litres and can be secured to the backrests of the front seats. The handle also makes it easy to slide out of the vehicle.

**Wheel information**

Please note the following information relating to wheels: Aluminium wheels with a high-gloss turned finish, or polished or partly polished aluminium wheels must not be used in the event of wintry road conditions. Due to the manufacturing process, the rim surfaces do not possess sufficient anti-corrosion protection and are at risk of long-term damage due to road salt or similar materials.
