Notes

¹ Weight of car, unladen, without driver (calculated in accordance with the current version of Directive 92/21/EEC). Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and top speed will be reduced accordingly.

² Electronically limited.

³ Recommended fuel is super unleaded with 95 RON. If this is not available, normal unleaded 91 RON may be used; power output will be slightly reduced.

⁴ Fuel consumption figures mentioned are as per the tests conducted by the ARAI.

Important note

Inspections are due as shown on the service display.
