Innovative technologies. Progressive design. And a wide range of equipment. The Audi A6 Sedan combines these values within an extraordinary symbiosis of sportiness and elegance. And opens a wide range of possibilities for pioneering mobility. Discover yours.

Fascination comes through in many facets.
Audi A6 Sedan

Dynamic design revealed in every line.

A sedan that will fascinate you at first glance. Emotionally stirring. Forward thrust made visible. A design that exudes progress and sportiness all along the line.

Take the tornado line. Underneath the side windows, it extends from the headlights to the rear. The horizontal orientation of all lines give the vehicle an even wider and sportier appearance at the front and rear.
Progressive design and innovative brilliance. Among other things, with near daylight illumination of the road. The LED headlights available as standard, turn night into day.

Impressive in any light condition: the Audi Singleframe in three-dimensional design. Flat and wide. Exuding excellence. With horizontal chrome struts that impressively emphasise the dynamism of the A6 Sedan.

The optional 45.72cm forged aluminium wheel in 5-twin-spoke design is an expression of power even when stationary.
Excellence shines through, strictly geared towards the driver.

An impressive sense of space combined with a comfort-oriented interior design. Special details in the A6 Sedan ensure the highest exclusivity. On request with MMI Navigation Plus with MMI Touch, the latest generation of Audi infotainment. With a large 20.32cm TFT colour display, a wide range of functions integrated in a user-friendly manner:

- Including impressive sound quality in every seat. Thanks to Bose Surround Sound. With 14 loudspeakers and a total output of 472 watts. Brilliant sound. Evenly distributed in the vehicle. Unmistakable. And noticeable. Due to subwoofers with a powerful bass reproduction.
Generous comfort that you can feel. Space and comfort generously designed with numerous storage spaces and practical stowing options; making every trip a relaxing pleasure.

Comfortable functionality. For example, when folding the rear seat backrest 40:60, using the convenient remote backrest unlocking function from the luggage compartment. The luggage compartment volume provides 530 litres of space. And with the rear seats fully folded down this increases to 995 litres.

As an option, the luggage compartment lid opens and closes electrically. With the optional convenience key and sensor-controlled release of luggage compartment lid, a corresponding foot movement is sufficient. The opening angle can be custom programmed.
Excellent dynamics and outstanding efficiency. Produced by highly efficient TFSI and TDI engines. With an impressive torque performance and thrilling acceleration values.

Thanks to innovative efficiency technology, fuel consumption and emission are reduced. For example, the more sophisticated start-stop system automatically switches off the engine in stationary phases. And even during the stopping process.

Audi drive select provides the highest efficiency while driving. With the modes that ensure individual vehicle adjustment. From comfortable to sporty. Particularly energy-saving in the efficiency mode. In combination with S tronic, including coasting mode, which switches to neutral early on when you release the accelerator.

Convincing performance is revealed in an efficient drive.
Driving performance and sportiness.

A higher torque output enhances transmission efficiency. Further improvements in the Audi wind tunnel at up to 300 km/h.

Aerodynamics, its efficiency. Not forgetting tyres; these are tuned up to 316 km/h.

Braking that leads to even more efficient driving. With brake energy recovery ( regenerated), part of braking energy is returned to the drivetrain.

Building on Audi’s extremely successful business, Audi has a single principle apply for all models: all vehicle components (including precision) in order to produce emission-reducing synergies. What started in accordance with this principle at the end of the 1980s with Audi lightweight construction and the revolutionary Audi Space Frame (ASF) is now taken on to the next level of the weight spiral. Every lightweight component has an impact on other components, which can in turn be traded smaller.

Building on these successes are continually being improved with regard to functionality, the lowest possible weight and their production process. With the goal of building vehicles that are even more efficient and make more sense to consumers. All the time, new and more efficient technologies are being built into Audi. These include recuperation and the start-stop system. Not to mention progressive, efficient high-tech engines. For greater driving dynamics, high compression, more efficient combustion and lower CO₂ emissions.

Lightweight expertise

Manufacturers of vehicles continually develop, improve and refine lightweight construction. The lightweight frame is a mass-reduction process, especially in higher performance cars. In the Audi RS-Q8, the engine and transmission, for example, are made of lightweight materials which are used to reduce weight whilst maintaining power and performance.

Transmission expertise

Audi weighs, measures, compares and consolidates. Audi lightweight technology. Other components are in the Audi lightweight construction process at every stage of the process, combining innovative materials and processes with aerodynamic design principles and creating a lightweight driving performance. Its all about the weights.

Recuperation

Building on this trend is an ever more efficient driving. With brake energy recovery (regenerated), part of braking energy is returned to the drivetrain.

The future of efficient technologies.
Performance

Maximum power. Put to maximum use.

Every movement originates from something. Something that sets it off, an idea. The engine in your Audi A6 Sedan can also be traced back to an initial spark of inspiration: higher power with lower fuel consumption. These apparently conflicting aims are combined in two revolutionary drive technologies: TDI and TFSI. Get acquainted with both of them.

And then opt for the drive system that you feel most moved by.

With their combination of direct injection and turbocharging, Audi TDI engines promise exceptional performance – thanks to their high torque output over the entire engine speed range with constant power build-up. They are renowned for being fuel-efficient and for reducing emissions. But they are incredibly dynamic too – letting you get the maximum out of any road.

Audi TFSI engines attain a particularly high compression rate. The result: outstanding efficiency combined with optimum performance. Substituting supercharging for cubic capacity has the effect of considerably reducing engine size and weight, while performance remains as impressively dynamic as ever. For power delivery that will win you over from the word go.
Get in. Buckle up. Start the engine. Wherever you’re heading, enthralling driving dynamics will power you there. For as you know, the world is your oyster you steer as you please. It’s road up ahead.

**Adaptive air suspension**
The electronically controlled air suspension system acts individually at each of the 4 wheels and makes sure that the handling characteristics are barely affected, even when carrying heavy loads.

**Audi drive select**
Audi drive select lets you adapt the driving characteristics of the Audi A6 Sedan model to your requirements at the push of a button. Sporadically, more comfortably, more balanced, more efficient or even individually tailored as you please.

Get a grip, start the engine, when you’re heading, enthralling driving dynamics will power you there. For as you know, you match youresper each step gives the wheel of your Audi A6 Sedan. You reach the goal. The desired style, the pace and you enjoy the satisfaction of achieved. You have peace in so far. More than enough to get the very best from every drive.

**S tronic**
The sporty, efficient dual-clutch transmission allows you to switch gears with lightning speed and enables brake upswitch or propulsion power.

**Dual-clutch system**
Dual clutch system lets you adopt the driving characteristics in all driving states at any time. You can even control your individual route or even individually selected as you please. It’s road up ahead.

**Drivetrain**
The sporty, efficient dual-clutch transmission allows you to switch gears with lightning speed and enables brake upswitch or propulsion power.
Navigation
With MMI Navigation Plus, you can let yourself be guided to your destinations with even greater ease via the 3D map view and 3-dimensional display of places of interest and landmark buildings.

Car Control
Car Control and other driver assistance systems, vehicle settings as well as climate control can be managed quickly and intuitively through MMI Touch.

Phone
Make phone calls safely and easily using the hands-free facility: simply select the number to dial from your contacts in the MMI or enter the number intuitively via MMI Touch.

Media
Display the covers of your music collection on all available media sources such as plucks, inserted SD cards, AUX media interface, CDs or DVDs.

The MMI – intelligent, individual, intuitive.
Simpler, simpler, logical. The world of mobile entertainment completely redefined: the Multimedial Interface (MMI). Phoning, navigating via Audi connect: all highly intuitive, highly functional and highly convenient – and that thanks to voice control. With the MMI in your Audi A6 Sedan, everything will be child’s play for you.

Simpler
MMI Touch makes operating the individual components of the Multi Media Interface even easier. The touchpad can even be operated using just one finger.
Audi Matrix LED headlights

See well.

Darkness is relative. The optional Audi Matrix LED headlights turn night into day. The all-new headlight technology produces a light colour similar to that of daylight.heads are an anticipatory feature. The Audi Matrix LED headlights allow for a much more distinct light distribution of your Audi A6 Sedan adapts according to the situation. This is all made possible by an array of sensors and a camera. As well as dimmable LEDs in an innovative arrangement — which, incidentally, are quite a sight in their own right.

Audi Matrix LED headlights

Look good.

Audi Matrix LED headlights don’t thrill you only at night. The new lighting technology is quite a spectacle during the day too, sometimes appearing as light points, sometimes as a dynamic light strip. Individually controllable LEDs. Perfectly adapted to the situation in hand. Showing the way ahead. An impressive sight, time and time again.
Your Audi is painted not just once. But four times.

When you choose a paint colour, choose one that best reflects your own personality. But whatever colour you opt for, you can count on the outstanding quality of our painting process. Though no thicker than a human hair, the layer of paint on an Audi is actually made up of four different coats. So not only do you look radiant in your Audi, the car is also optimally protected from environmental influences and wear—For its entire lifetime.

Premium quality you can rely on.

You have a special place in your Audi. Exquisite comfort can be felt in the front and rear seats thanks to high-quality materials and first-class workmanship.

Milano leather upholstery and trim

Extremely hard-wearing and durable leather that gives a high-quality impression with its fine, grained surface. Fully penetrated with dye and tanned without the use of chromium, the leather provides outstanding surface protection thanks to the paint finish.

For standard seats, front

Front centre panels, seat side bolsters, head restraint centre panel and on the armrest. Front in Milano leather, door trim panels in artificial leather.

Seat comfort

Front seats, electrically adjustable, including memory function for the driver seat with electric adjustment of seat height, fore/aft position, seat and backrest angle and electric 4-way lumbar support; 2 presets for the electrically adjustable driver seat and exterior mirrors.

Centre armrest, front

With adjustable angle and in movable lengthways, Optionally storage compartment (with armrest extension).

Head restraints, rear

With adjustable angle and in movable lengthways, with armrest (in front seat variants).

Milano leather upholstery

Milano leather, almond beige

Milano leather, nougat brown

Milano leather, atlas beige

Milano leather, aubergine brown

Experience fascination.
Down to the last detail.

Exclusive ambience is a question of style. Your style. A style you can refine right down to the last detail. Create tangible accents with high-quality Audi inlays. Take pleasure in smooth wood that radiates a natural warmth. Experience the fascination of open-pore wood whose exclusivity you can literally feel.

Full-surface inlays for the dashboard, centre console and door trims.

Birch wood, natural agate grey
all-round inlay and surrounds of door trims and centre console in aluminium look
Headlights

Audi Matrix LED headlights

This innovative technology combines a camera system with LED light sources and precision optics for highly dynamic, precise lighting. The system constantly scans the road ahead and detects upcoming vehicles or other obstacles in its path from a distance of up to 200 meters. Depending on the road situation, the headlight beams adapt, for example, when driving into a bend, or to changing traffic conditions. An additional laser light, which automatically increases headlight range in a special pattern, is included. To reduce service life, all-weather lighting configurations with low energy consumption and long service life.

LED rear lights with dynamic indicator

Same function as the LED rear lights, additionally featuring a dynamic and easily recognisable lighting pattern for the indicators. The segments of the LED rear lights with dynamic indicator features are illuminated in turn in white, amber and red, providing a pulse of light that runs outwards in the direction in which the car is turning. When operated, the indicator sends a distinctive signal to other road users.
Convenience key with sensor-controlled release of the luggage compartment lid. Items as for convenience key. Automatic opening of the luggage compartment lid via a foot gesture (kicking movement) underneath the rear bumper when the vehicle key is recognised.

Storage package
- 2 cup holders in the centre armrest, rear
- Luggage compartment net for securing on the lashing points on the luggage compartment floor
- 2 additional 12V sockets in the rear

Items as for convenience key. Automatic opening of the luggage compartment lid via a foot gesture (kicking movement) underneath the rear bumper when the vehicle key is recognised.

Storage/Transport
- Slide-out rails in the entire rear seat area, rear luggage compartment well for securing on the lashing points on the luggage compartment floor, 2 additional 12V sockets in the rear

Convenience key with sensor-controlled release of the luggage compartment lid. Items as for convenience key. Automatic opening of the luggage compartment lid via a foot gesture (kicking movement) underneath the rear bumper when the vehicle key is recognised.

MMI Navigation Plus with MMI Touch
- navigation system including map updates
- electrically extending high-resolution 20.32cm colour display
- 3D map representation with display of lightning information and city models
- variable information: map summary, choice of alternative routes, PowerPoint presentations, lane recommendations, rerouting, detailed junction maps, etc.
- MMI Touch: touch-sensitive control panel for fast, intuitive operation, e.g., destination entry by means of handwriting recognition as well as free movement and zooming in the map
- voice control system with what-you-see-is-what-you-get voice control
- driver information system
- CD player and 2 SDHC memory card readers (up to 32GB), each MP3, WMA and AAC compatible
- Audi music interface for the connection of portable media players such as Apple iPod, Apple iPhone (music functionality) as well as USB flash memory up to 16GB
- Bluetooth interface for hands-free mode and audio streaming
- MMI Touch

Light Design
- steering wheels/controls
- infotainment
- assistance systems
- technology/safety

Entertainment

MMI Radio plus
- MMI control concept with electrically extending 6.51cm colour display, separate MMI control panel
- upgradeable system
- 4.4 information system
- plug and play: systems and modules to 3.5GB, microSD, USB and iPod compatible
- fast menu interface for the navigation of playable media contents such as Apple iPod, Apple iPhone (music functionality) as well as USB flash memory up to 16GB
- MMI Control: separate control panel
- MMI Touch: touch-sensitive control panel for fast, intuitive operation, e.g., destination entry by means of handwriting recognition as well as free movement and zooming in the map
- voice control
- Bluetooth interface for hands-free mode and audio streaming
- MMI touch

Bose Surround Sound System
- impressive surround sound reproduction thanks to 12-channel amplifier with a total output of 472 watts and 14 loudspeakers including centre speaker and subwoofer
- audioPilot for noise-dependent volume adjustment and reproduction of 5.1 surround sound in conjunction with optional MMI Navigation Plus with MMI Touch
- powerful and accurate bass reproduction, lifelike sound with natural tone and a feeling of space for an impressive sound experience

Audi smartphone interface
- connects your smartphone to your Audi
- takes the smartphone contents directly to the MMI display smoothly via USB
- navigation, telephone system, music and selected third-party apps can be conveniently controlled via the MMI controller as well as the voice control system
- Bluetooth interface allows hands-free calls to be made in the vehicle using the microphone and, depending on mobile phone compatibility, Bluetooth audio streaming
- Bluetooth capable mobile phones can be connected to the vehicle via the interface
- MMI Radio Plus, MMI Navigation Plus with MMI Touch

Preparation for Rear Seat Entertainment
- hub for installation of audio and media units for the rear seats in the door储 with each sound seat backrest
- integrated Apple iPod adapter available as a plug-in plug-in and from Audi genuine accessories

### Assistance systems

- **Parking system plus**
  -awards and visual parking system | front and rear assistant with parking aid monitoring.
  -Display on MMI center screen.

- **Auto release function**
  -holders the vehicle stationary for unlimited periods after stopping in traffic on normal uphill or downhill gradients. The system is activated by push-button and allows the driver to drive away smoothly.

### Rear-view camera

- Image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the path calculated based on steering angle; auxiliary lines and guidelines as well as display of the point at which the vehicle will arrive. The reversing camera is integrated discreetly in the handle strip of the luggage compartment lid; activated when reverse gear is selected or via a button on the centre console.

### Cruise control

- at speeds of 30 to 250 km/h, the system keeps the set speed constant provided that engine power and engine braking effect permit it; operated via separate steering column stalk, set speed displayed in driver information system.

### Technology/safety

- **Recuperation**
  -economises on fuel via brake energy recovery; kinetic energy is converted into usable electrical energy by increasing the generator voltage when the vehicle is coasting or braking and relieving the generator during subsequent acceleration.

- **Start-stop system**
  -helps to reduce fuel consumption and CO₂ emissions by automatically switching off the engine when stationary e.g. at traffic lights.
  -The engine is restarted as soon as the footbrake is released (automatic transmission). Can be deactivated via a button at any time (Audi A6 35 TFSI only).

### Driving dynamics/brakes

- **Audi drive select**
  -Adaptive air suspension
  -different modes – auto, comfort, dynamic, efficiency, and individual – allow you to adjust the vehicle’s characteristics by adapting the power steering assistance, engine or gear changing characteristics (for S tronic), adaptive engine timing, engine braking characteristics (for 463), adaptive engine management. Individual mode allows for more personalized settings.

- **Adaptive cruise control**
  -automatically regulates vehicle speed and improves the flow of traffic. The system works in conjunction with the adaptive cruise system and adapts to the vehicle’s speed. It automatically regulates vehicle speed and improves the flow of traffic when the vehicle is actively engaged in traffic.
### Audi A6 Sedan

#### Technical data

**Dimensions in millimetres.**
- Dimensions were measured with vehicle at unladen weight.
- Luggage compartment volume 530/995 l (second value: with the rear seat backrest folded down).
- Turning circle approx. 11.9 m.

*Maximum headroom. **Elbow room width. ***Shoulder room width. ****With roof aerial the height of the vehicle is 1,468 mm.
